PROJECTS

Ecommerce Backend – LuxeGear
12/2025 to 01/2026

- MERN-based e-commerce application with JWT authentication and RBAC.
- REST APIs for products, cart, and orders.
- MongoDB schema design.
- Protected routes and password hashing.
- Deployed on Vercel (frontend) and Render (backend).

Ecrime-Sentinel – Cyber Crime Reporting Platform
09/2025 to 10/2025

- Admin panel with RBAC and JWT authentication.
- Complaint management system (Pending / Resolved / Denied).
- REST APIs for complaint submission and status updates.
- MongoDB-based data handling and validation.

Film Craft – Desktop Video Editor
10/2024 to 03/2025

- UI development using C++, Qt, and QML.
- Modular interface for timeline and editing tools.
- Discontinued the project due to academic priorities and increasing system complexity.
